

## Landmark Pinnacle London

**Market Sector:**  
Residential

**The Client:**  
Chalegrove (CPL)

**Services supplied:**  
Specialist Joinery

### THE PROJECT

For the show apartment for Chalegrove's high-end residential project, we created bespoke feature pieces within the unit, managing the process of design and manufacture on some items. We fitted the front door, a credenza, a living wall, doorsets, ironmongery and oak flooring, and the project took around six weeks.

### THE PROCESS

High quality, interesting bespoke design was key to our success here: the front door featured blackened metallic edges and wraparound panels, the living wall required irrigation and the free-standing oak credenza – a softwood frame clad in American oak and stained white American oak panels - also featured a granite top that we had to source and measure.

For further information on our carpentry and joinery services, or for an informal discussion about your project requirements please contact us directly:
